

Great Stay App

Make every stay a
Great Stay

About Great Stay App

It is our mission to turn every stay into a 'Great Stay'! Designed to fit the needs of hotels, B&Bs, holiday parks and rental agencies, we have developed the Great Stay App. The Great stay app allows your guests to easily access information and functionalities that enrich your guests' stay experience and increase their overall satisfaction.

Ready for the future

We are continuously improving our product by collecting customer feedback. We use this feedback to adapt and enhance existing features, and to create new features so that they continue to meet changing customer needs.

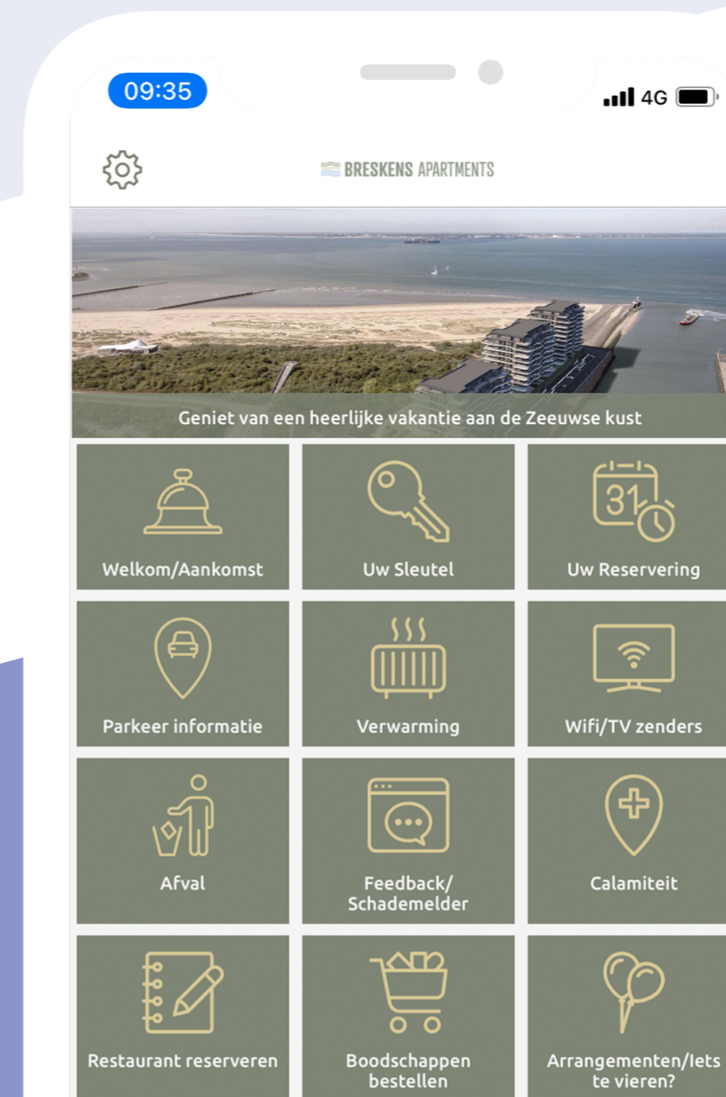

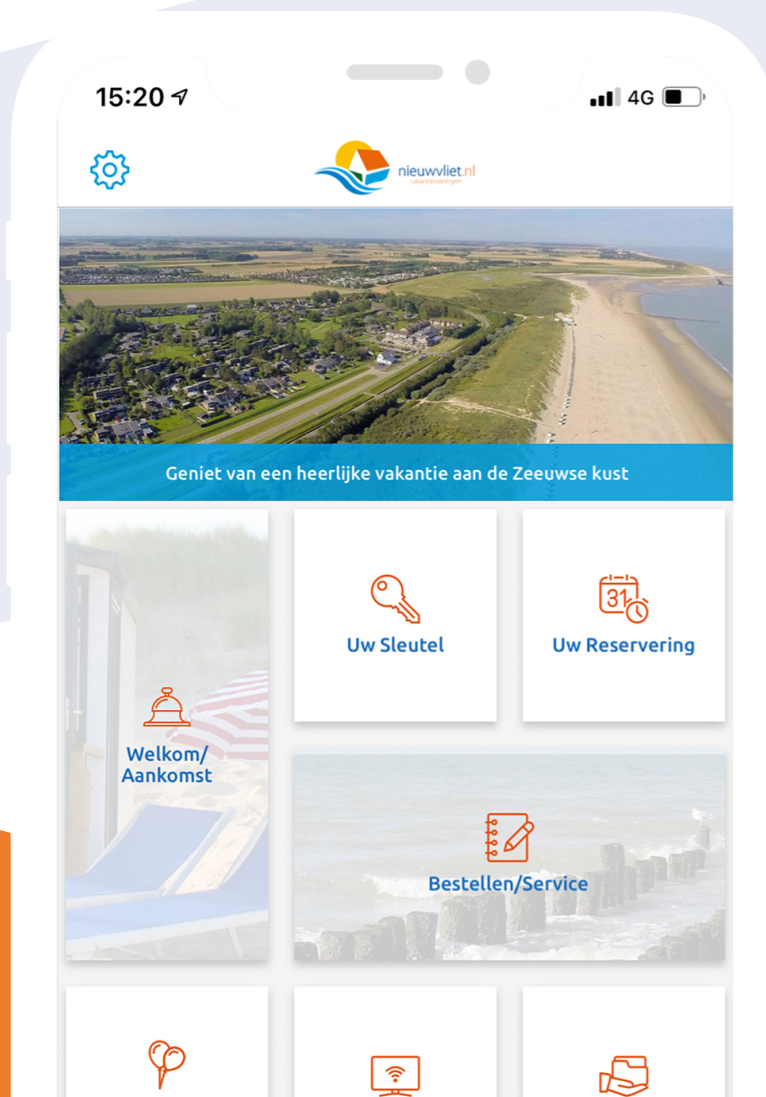

Easy to use

With our user friendly Content Management System (CMS) you can easily create, draft, edit, publish, and promote content by sending push- notifications and pop-up messages.

Improve the way you run your business, stay engaged with your guests, enrich their experience, and save time. Make every stay a "Great Stay"!

Our advantages:

- Reach guests directly;
- All information bundled in one app;
- Fully in your look and feel.

Features

View and manage booking details

Guests always have important information and booking details at hand. Due to the link with your reservation system, they can easily manage bookings or send a message.

- Linked to your reservation system
- Easily manage bookings
- Send instant messages
- All booking information at hand

Digital notice board

Save up to 80% on emails, phone calls and relieve the pressure on reception with the digital notice board. Keep guests informed and create interaction through the opportunity to respond to messages. Share photos of animation activities, found objects and respond directly to messages from the reception.

- Keep guests informed;
- Share photos and important information;
- Allow comments and 'likes' from guests.

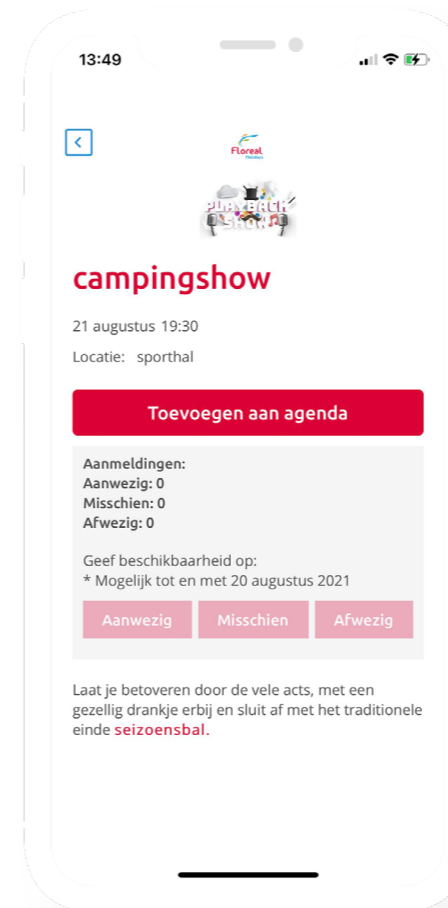

Call reception

Allow your guests to call the front-desk at the touch of a button.

Inform your guests

Focus on informing your guests and share tips and hidden gems.

Push notifications

Reach out to your guests with in-house offers and important news by sending push notifications!

- Reach guests in one click;
- Direct attention to your app.

Activities agenda

Make sure your guests never miss an activity or event with the calendar feature.

- Always the best activities at hand;
- Clearly displayed;
- Sign up immediately.

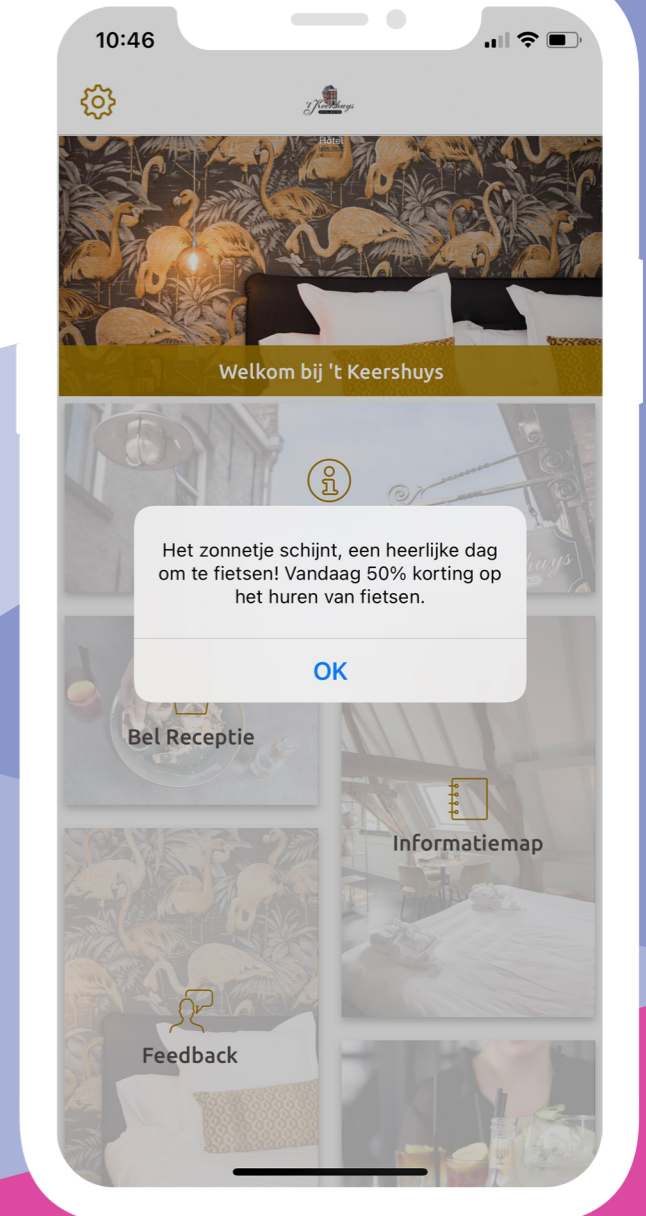

Surveys

Gain insight and improve customer satisfaction by collecting reviews and feedback from guests.

Mobile key

Open doors from the app.

Activities

Provide guests with inspiration and show the best outings in the area. These outings are automatically retrieved from the database and clearly displayed via a Google Maps map or list view.

- Always the best outings at hand;
- Linked to Google Maps;
- Clearly displayed.

Feedback and reviews

Curious about what guests thought of the stay? The integrated feedback and review form allows guests to rate their stay.

- Improve services
- Integrated form in the app
- Receive responses by email
- Evaluate and improve!

Contact information

Contact details always at hand.

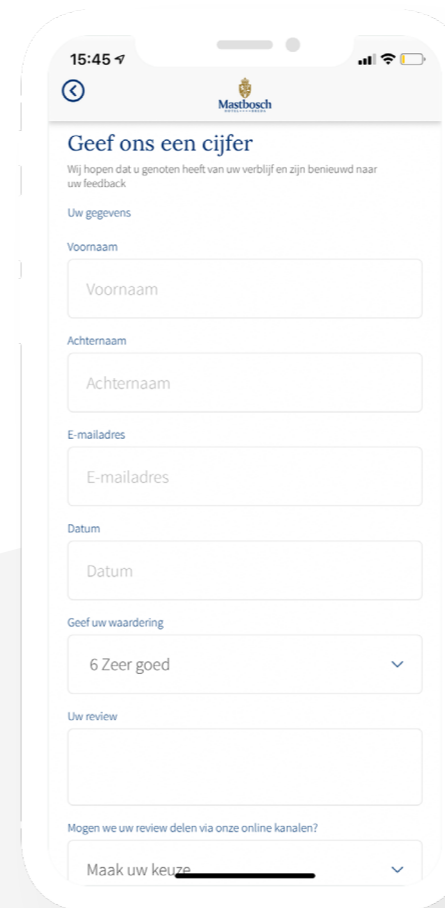

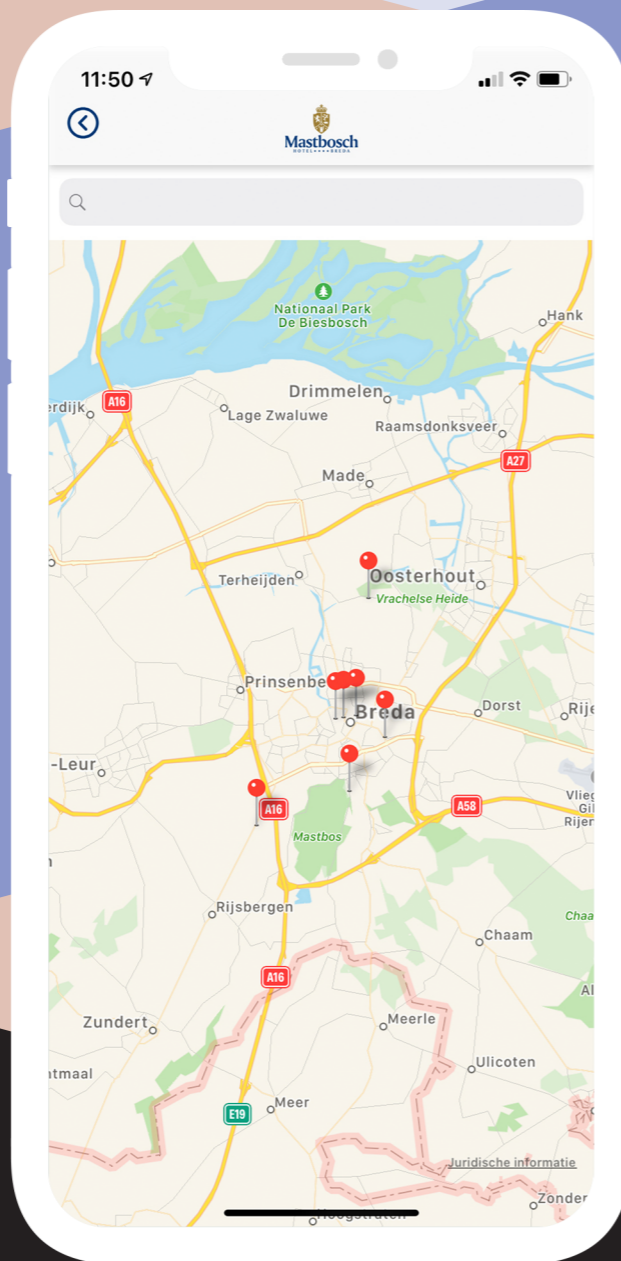

Check in online

Avoid queues at the reception.

Corona proof

Covid-19 checklist from the app.

Secured

Password protect certain functionalities.

Wifi button

Share the Wi-Fi code at the touch of a button.

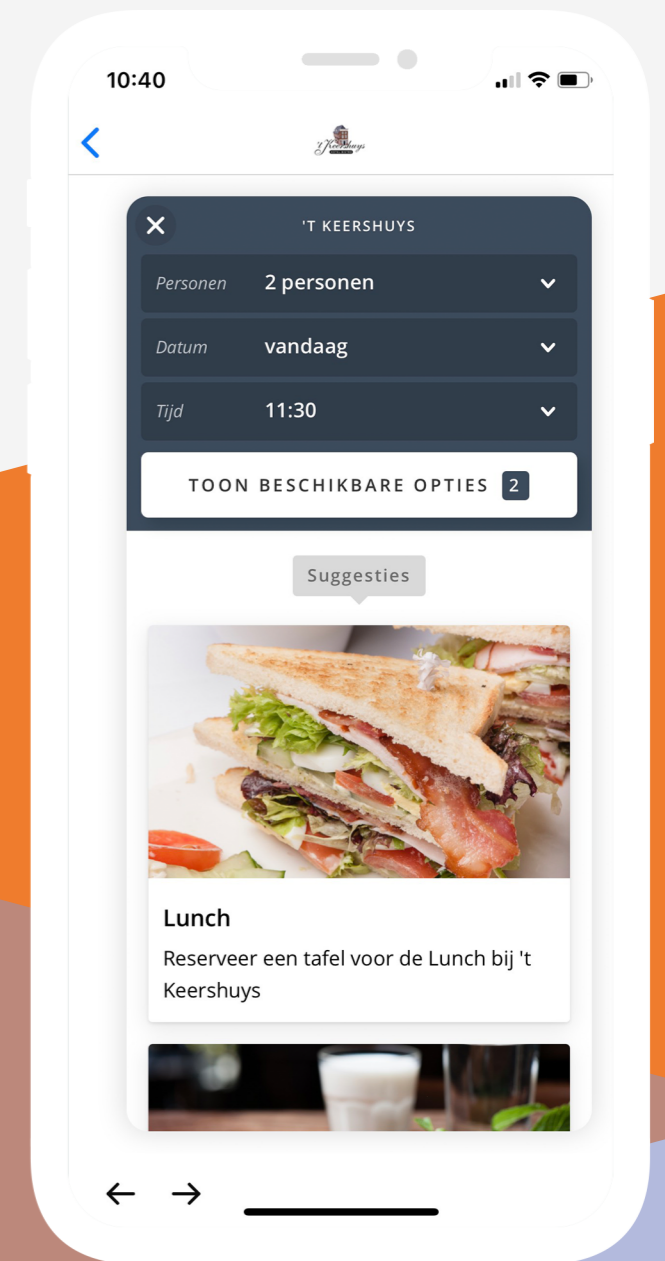

Wake up call

Guests set the wake up call themselves, the reception will wake them up.

Integrated reservation module

The perfect end to the day! Offer guests the option to directly reserve a table in your or another restaurant.

- Easy to book;
- Ideal for hotels with a restaurant;
- Linked to your reservation system.

Digital information folder

Done with constantly recurring questions and all the many brochures and folders. Give guests direct access to the information they are looking for with the digital information folder.

- Always up-to-date;
- Save printing costs;
- All relevant information bundled;
- Keep your European Hotel Classification.

Integrated ordering module

Guests easily order room service, extra linens or late-night snacks. They also directly book facilities such as bicycle rental or wellness via the app.

- Up to 70% more upsell moments;
- From room service to wellness;
- Send a push notification for promotion.

Look & Feel

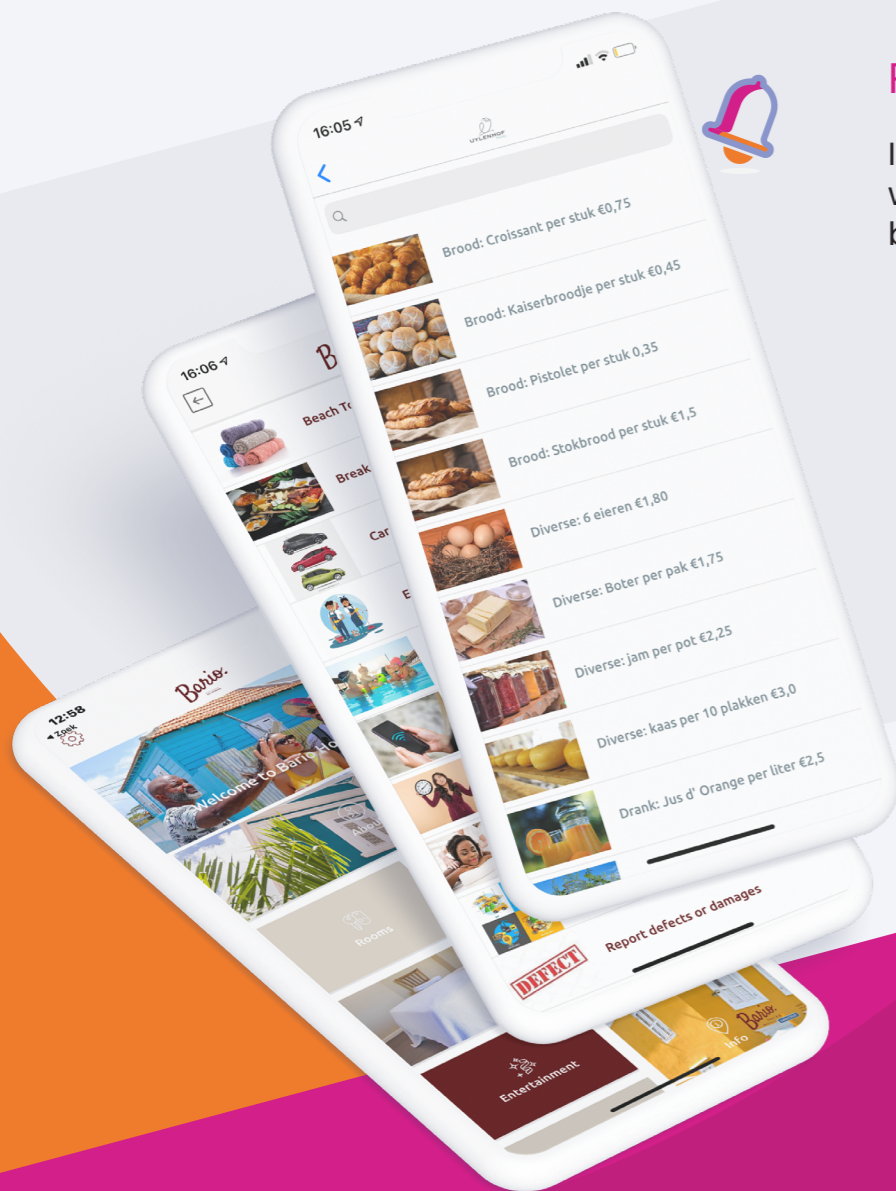

A unique app, made to fit your company's brand identity.

Pop-up messages

In-app messages that pop up when using the app, ideal for brief messages or promotions!

Web module with QR-code

With the web module you transfer important information to guests without downloading an app. Increase the guest experience and bundle all relevant information in one clear web page. This page is opened by scanning a QR-code.

- Important information always at hand;
- No need to download, scan the QR-code;
- Easy to manage.

Communication Cockpit

Fast and simple

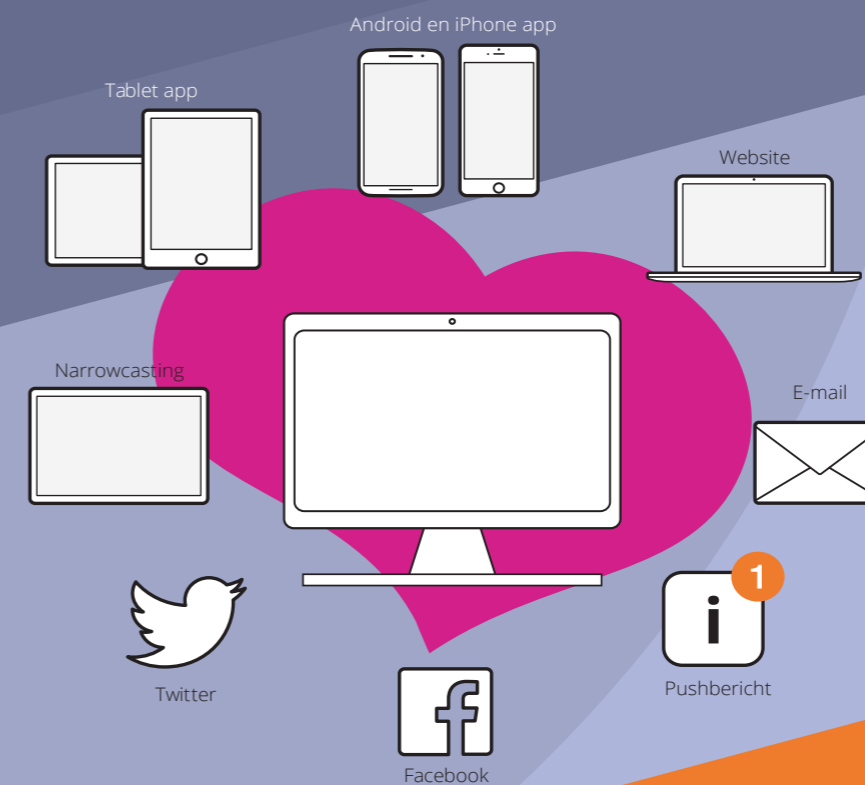

The Communication Cockpit is our Content Management System (CMS) that is included by every Great Stay App. Via this CMS you can quickly make changes in the web module and app.

Always up-to-date

All our solutions are constantly being improved, with regular updates. We do not lose sight of user-friendliness.

Voordelen

- No more duplication and mistakes;
- Manage your app and web module from one system;
- Supplied for free.
