We believe that combination of our control access solutions and our provided Partner service are the

best recipe for success. That's why **homeit** Partners are specialists in sales, installation and after-sales support.

If you want to become a **homeit partner, please send an email to partners@homeit.io and join a solid brand that can help you complement your value- proposition and product offering to your customers.*

Our solutions

Remote access control

Remote access to your lock

homeit, is a leader in access control systems that offers an extensive smart locks range, wireless and wired, able to meet your business or home needs.

Have total control over the access to your door using a smartphone, PC or tablet. Create digital keys, send them to whom you have granted access to your property with all security and controlled way.

Control who enters and who's out, without traditional keys, and know exactly who is coming in, when and how they've entered (ej. APP or code), even when you're away. With a smart lock, you can easily open your door remotely, no matter where you are.

- Open the door remotely from anywhere.
- Receive notifications about your smart lock's activity.
- Control when and who has access to your home or business.
- Create personal codes to family, friends or household services which only allow entry on certain days and/or at certain times

Wherever you are, you can allow access to your home or business by remotely assigning temporary access, via personal digital codes, to those who need to get in.

homeit in VR

GENERAL SYSTEMS FEATURES

Easy access

homeit smart locks works through wireless, local or internet (in this case a **homeit BOX** is needed).

Easy management

Open the flat and street doors via **homeit** web APP®, SMS or keypad, with personal codes with expiry dates.
